

THE EAST TENNESSEE UNION FLAG.

Doctr.

The Dignity of Labor.

To tell that over nature
Gives man his grand control,
And purifies and hollows
The temple of his soul.
It staves fom disease,
With all their ghastly train,
Puts iron in the muscles,
And crystal in the brain!

The Grand Almighty Builder,
Who fashioned out the Earth,
Hath stamped his seal of Honor
On Labor from her birth,
In every angel-flower,
That blossoms from the sod,
Behold, the master touches;
The handwork of God!

Agricultural.

The Advantage of Deep Tillage.

One dry season the carrots were generally very small, an acquaintance of ours had about one-fourth of an acre of them planted on ground that had just been ploughed to the depth of twenty inches. A large proportion of those carrots were twenty inches long and blunt at the point. They wandered down in search of water till they were stopped by the hard ground, when unaffected by the drought in the upper world, they expanded liberally, and the result was a prodigious yield.

Milk.

Dr. Philip Karel, physician to the Emperor of Russia, has a record of two hundred cases, treated by himself and others, in which milk was the chief and often the sole remedy. He claims that in impoverishment of the blood, in all droppings, asthma, pulmonary catarrh, neuralgia arising from disorders of the intestinal canal, and in certain diseases of the liver, milk is the surest and best remedy. He gives three or four times a day from two to six ounces of skimmed milk forbidding all other nourishment.

Eggs-ordinary.

Thomas Smith, farmer for Wm. C. Pritchett, Esq., of Haverford township, this county, writes us relative to the Ohio egg, which was described in our last issue. Recently he had a very large egg which, on being boiled, was cut in half—in one end there was a perfect egg, in the other another perfect egg, enclosed in which was another, and so on to the fourth—there being five eggs within one, all complete, and each having a separate shell. His statement is couched as entirely true. It furnishes an egg-ample that is certainly marvelous and we call upon the hens of any other section to beat it if they can!—*Delaware County American.*

Heart on the Right Side.

There is a young man attending college in Albion, Michigan, whose heart is on the right side. He has been examined by several of the most noted Physicians of New York and Washington, who will agree that such is the case. This is the second case on record of the kind.—*Exchange.*

The post mortem examination of Rev. Jason Whitman, brother-in-law of ex-Gov. John Fairfield, of Maine who died at Postland, Maine, some years since, of Pleurisy, disclosed that his heart was on the right side. Perhaps this is the first case referred to. Mr. Whitman was an active and efficient clergyman, beyond middle life, and the first Secretary of the American Unitarian Association. Few men have worked harder or preached more than he did.—*Boston Transcript.*

Referring to the above, Dr. Robt. R. Carswell, Examining Surgeon in the 2nd New Hampshire District, says he found during the war two men, both citizens of Nashua, whose hearts were displaced, and in each case upon the right side.—*Portsmouth (N. H.) Chronicle.*

Hog Cholera.

A Kentucky hog breeder gives the following as a cure for this disease: After trying a good many cures (or what persons said would be), the only remedy seems to be—with the syringe give the hog an injection of strong, warm soap-suds (concentrated lye soap was used) and cut off the tail. Either part of this remedy only failed, both did not, except when the hog was far gone.

Cropper Cake.

Four eggs, one cup of butter, one cup of molasses, one cup of sugar, one cup of milk, and four cups of flour. Cinnamon to taste or a little lemon, one teaspoonful of soda, and two cups of cream or tartar.

Good Advice.

An auditor with an eye to payment for what he sells, indulges in this list to his of philosophy: "Every man ought to pay his debts, if he can; Every man ought to get married, if he can. Every man ought to work to suit his customers, if he can. Every man should hold her tongue, if she can. Every lawyer should occasionally tell the truth, if he can. Every man to mind his own business and let other people's alone, if he can. Every man should take a newspaper, and pay for it anyhow."

THE LEGAL ADVERTISING.

WHEREAS, THE LEGISLATURE OF Tennessee has enacted the following law:

AN ACT to regulate the publication of legal notices.

Section 1. Be it enacted by the General Assembly of the State of Tennessee, that it shall be the duty of the Governor, upon the passage of this act, to designate such newspapers in each and every Congressional District in the State, as in his judgment the public interest may require, in which all legal advertisements required by law to be made in a newspaper shall be published, for every county in such Congressional District, as required by law—orders of publications, attachment at non-resident notices, sales of land by decree, exemption, mortgages, and for taxes, by Sheriff, Clerks and all other officers, together with all other advertisements required by law to be made and published in a newspaper of whatsoever nature, which newspaper shall be printed and published in the Congressional District in which they shall be so designated. Provided, that no such paper so designated shall become an official newspaper for the publication of the legal advertising of any County or District for which it may be so designated, unless such appointment shall be confirmed by the Senate; and provided, further, that not more than one newspaper so designated in any one county; provided, that in any district where a German paper is published, and when the number of population may justify it, such German papers may be designated additionally.

Sec. 2. Be it further enacted, That all newspapers so designated shall be the official newspapers for the County and for the Congressional District in and over which such newspaper shall be published, and which the editor or publisher of such newspaper, upon the payment of the printer's fee, to die in the Clerk's office of the court having jurisdiction of his affidavit, with a printed copy of such advertisement appended, together with his receipt for the payment of the printer's fee, paid by the party at whose instance or for whose benefit such advertisement shall have been made, to be collected as other costs, which affidavit shall give the date of the paper in which the advertisement appeared, and be filed and recorded by the Clerk as the legal evidence of the publication of the same to be read, or a certified copy thereof, in all courts of law and equity; and any such publication made contrary to the provisions of this act in districts where newspapers are so designated shall be null and of no effect.

Sec. 3. Be it further enacted, That the compensation to the publishers of the newspapers in this act be the same as now provided by law for similar services; and all laws and parts of laws in conflict with this act be repealed; and the same are hereby repealed.

They are, without doubt, the best, the most lasting, and conveniently the cheapest. We are content with a small sum. Our prices range from \$300 to \$2000 up.

1864 May 15—Agra, 1864, Broadway, New York.

G. & H. BARMORE.
PIANO-FORTE
MANUFACTURERS,

Way-End 34, Eighth Street, New York City.

22 Years Established, and 27 Prize Medals Awarded.

Our Piano Fortes are now universally acknowledged by the musical world to be the best in the market, and where the piano fortissimo introduced and used, we are not required to say one word in their favor, their excellence stands pre-eminent to those of other makers, and to the great success of our instruments we owe the fact that in the twelve years, we can afford to sell at a net price of \$100 to \$100 less than a similar one can be bought elsewhere.

Every Piano Forte Warmed for Five Years, and to give Satisfaction.

Our Pianos are made to last: the materials used for every part are those of the very best quality that can be procured. No part is lighter than the public eye might pass over, never suspecting our vigilance. Every part, inside and out, is accurately balanced, and ingeniously made, so as to give the longest and most minute vibration. The strings are tied in the bows of steel plates, which is bad in the beginning, and grows worse every day; insomuch as it is violent and delicate, puts in its vibrations, delighting the ear, exciting curiosity, and has all the power necessary to produce a fine instrument.

They are, without doubt, the best, the most lasting, and conveniently the cheapest. We are content with a small sum. Our prices range from \$300 to \$2000 up.
